

Extended Asset Use

Flexible Asset Utilization...

The effective management of railcars is critical to the success of HCRY and our customers. Efficient asset utilization benefits you by increasing the availability of railcars. From time to time, you may need to use our railcars for a longer period of time. In that case we provide you, at your option, with the use of that equipment, for a fee.

Extended use of railway provided assets

If you use our railcars for a longer period of time, you will be subject to our debit/credit system which calculates credits and debits to arrive at a monthly total. If credits exceed debits, no charge will be incurred. If debits exceed credits, the charges below apply per debit. Billing will only include cars placed within the calendar month. At no time will credits be shared between loading and unloading events.

Note: Debits do not apply to non-chargeable days, as defined in the Canada Region General Tariff 1000 Section III, Demurrage and Storage Provisions.

Billing Policy

As part of our efforts to streamline the billing process, we are committing to an expedited and simple billing policy.

Billing On-Time

We commit to bill you on time

We have changed our systems to issue Extended Asset Utilization invoices monthly.

Billing Disputes

We commit to addressing disputed bills quickly

If you believe that there has been a billing error, we want to make it right as quickly as possible.

To be eligible for a review, a claim must be submitted, in writing, within 30 days of the invoice date to:

CanadaDisputes@gwrr.com

Along with a brief description, your claim must include the car initial and number and the related invoice number.

Any claim not filed within thirty (30) days from the date of the invoice will be declined.

Any non-disputed charges should be paid by the due date listed on the respective invoice.

Flexible Car Ordering...

Things don't always go as planned. We recognize that, sometimes, you will have to change your railcar order for loading or unloading. When this involves ordering an empty railcar for loading and actual or constructive placement is performed, and the railcar is then released without being loaded, it is classified as a *railcar ordered but not used*.
