ISSUED: October 16, 2023

EFFECTIVE: October 16, 2023

Definition of Switching Terms:

Terminal Switching- A move between industrial tracks and a point of interchange with a connecting carrier, either direct or through an intermediate carrier, when such connecting carrier has had or will have a road haul movement on that shipment.

•Single Car Rate - All commodities \$390.00 per car

Application of Switching Charges:

Except as otherwise noted:

- (A) Switching charges named herein will cover the handling of cars loaded one way and empty the other, between the points provided for. If car is loaded in both directions, regular charge will be made for each loaded movement.
- (B) Empty cars handled in one direction and not in connection with a loaded movement, or empty car(s) placed or constructively placed per shipper's request but not used, will be assessed the intra-terminal switching rate unless cars are defective or unfit for loading.
- (C) Each movement of an empty or loaded car switched within the confines of the same plant or industry will be considered a new move.

Absorption of Connecting Lines Switching Charges:

On all carloads which originate or terminate on lines other than HESR, a maximum of \$330.00 per car will be absorbed by the HESR. Any charges exceeding that amount will be in addition to the line-haul charges and will be assessed against the party paying the line-haul transportation charges unless arrangements are made to the contrary. Absorption provisions published in other tariff take precedence over those provided for in this section.
